

Anggi Giji basin

Post-tour extension to Amazing Arfak birding expedition

4 days/4 nights

From € 644

Deposit: € 160

Single room supplement: € 18

The twin mountain lakes of Anggi Giji and Anggi Gita, situated at 1,860 m elevation in the Sougb-country of the southern Arfak Mountains, were first visited by a western naturalist in 1904, but it was a young Ernst Mayr who in 1928, at the beginning of an extremely productive career in ornithology and evolutionary biology, discovered the area's paramount ornithological attraction on the eastern shores of Anggi Giji: an entirely new species of munia, which E. Hartert named *Lonchura vana*, and which is now more commonly known as the Grey-banded Munia.

Whereas this restricted-range species subsequently has been found in the secluded upper Kebar Valley of the Tamrau Mountains, the Anggi Giji basin remains the easiest accessible location to come to grips with this munia and other wet grassland specialists like Lewin's Rail *Lewinia pectoralis* and Spotless Crake *Porzana tabuensis*, moreover in a visually stunning setting. And stands of swampy *Pandanus*-dominated forest at the base of the surrounding slopes support the highly sought-after Shovel-billed Kookaburra *Clytoceyx rex*, with a good selection of the montane Arfak avifauna waiting to be explored uphill.

When?

Generally excellent year-round, though flood levels at the height of the rainy season, during the period December to February, may at times make movement through parts of the basin difficult.

Scheduled departures

Please enquire for details on our upcoming departures.

Physical toughness

Relaxed birding in flat or only slightly sloping terrain.

Tour summary

Day 1-4 > Anggi Giji basin.

Day-by-day itinerary

Day 1 > After a pre-dawn breakfast in our Ransiki hostel we shall set out on the two hours' drive by 4WD-vehicle to Irai along the shores of Anggi Giji. From here we shall bird all morning following the seasonally fluctuating lake edge to the settlement of Hunku. Pacific Black Duck, Common Coot, Little Grebe, Little Pied and Little Black Cormorant, Great and Intermediate Egret, and Rufous Night-Heron abound and it shall not take long before we spot our first flock of Grey-banded Munias, which in season can congregate in flocks of more than 150 individuals. But observing the two secretive rails may require considerable effort and is influenced also by water levels in the basin. After lunch we shall bird all afternoon in the lakeside grasslands where we may accidentally flush Lewin's Rail. Come evening and we shall take up position at locally exposed muddy stretches at the interface between grassland and reedbeds bordering the lake's edge. Here both Spotless Crake and Lewin's Rail ordinarily come out to feed at dusk and we may hear both species vocalizing in season. Other birds we may see here include Black and Yellow Bittern, Clamorous Reed-Warbler, and Tawny Grassbird. Dinner and overnight at Hunku.

Day 2 > We shall spend the first hour of light at muddy stretches and reedbeds along an affluent of Anggi Giji, then walk through grasslands toward a camp at the edge of the basin, where forest extends onto the surrounding hill slopes. After lunch here, we shall first bird the grasslands in this area where we stand another chance of seeing Lewin's Rail, and later shift to the forest in the hope of finding Shovel-billed Kookaburra, perhaps as it starts calling toward dusk. Other noteworthy forest birds that we may encounter here include New Guinea Woodcock, New Guinea Eagle, Vogelkop Bowerbird, Rufous-sided and Western Smoky Honeyeater, Vogelkop Scrubwren, and Black Sicklebill, while a nocturnal foray after dinner could produce Jungle Hawk-Owl, Large and Mountain Owlet-Nightjar, and Large-tailed Nightjar. Overnight at camp.

Day 3 > We shall seek Shovel-billed Kookaburra at first light and spend the rest of the morning in the forest and

grassland here. After lunch we shall walk back to Hunku where we shall bird along the lake's edge until dusk providing us with yet another opportunity to observe the rails. Dinner and overnight at Hunku.

Day 4 > We shall enjoy a final morning's birding along the lake's edge toward Irai where 4WD-vehicles await us to transport us to our Manokwari hotel. Lunch in Ransiki. Dinner and overnight in Manokwari hotel.

What the tour fare includes

The individual tour fare of € 644 covers all costs incurred from your morning departure at Ransiki on trip day 1 until your overnight's stay in Manokwari on day 4, insofar in congruence with the tour itinerary detailed above and our published terms and conditions (see Related links).
